WORK EXPERIENCE

- **Self-Funded AI Venture** Tehran, Iran
Founder and Engineer Mar 2024 - Jul 2024
Specializing in Automated Document Image Analysis
 - The problem: Many small to medium companies, especially in developing countries, **lack structured data pipelines, hindering efficient business operations** and inter-company interactions.

- Developed an automated document image analysis platform to **transform unstructured, denormalized documents into accessible, structured data**.
- Created a **no-code/low-code configuration system** for easy customization and business logic validation
- Integrated a **human-in-the-loop review process** for quality control and compliance
- Outcome and Insights: While the venture **did not achieve commercial success**, it provided valuable learnings:
 - * Impact of **infrastructural resistance** to data standardization
 - * Complexities of **localization** of global tech solutions
 - * Effects of **regulatory environments** on innovation
 - * **Bureaucratic preferences** for transparency prevention in process management

Panafor

Karaj, Iran

• *Full-time Machine Learning Specialist*

Apr 2022 - Jan 2024

Specializing in Data-driven Decision Making for Business Optimization

- The Problem: Developed and implemented a **Data-driven AI solution** that optimized resource allocation by **prioritizing high-potential customer profiles**, significantly **reducing operational overhead and minimizing errors** in processing critical applications.
- Impact: Decreased personnel error by 10%, **mitigating potential losses equivalent to 5.5 times my annual salary**. Also, **awarded for dedication and leadership**, leading to two promotions and a 70% salary increase within one year. Moreover, **I established myself as the primary resource for onboarding and training** new team members, receiving praise for my **ability to simplify fundamental concepts**.
- Developed a **comprehensive screening process automation** from customer communication to profiles prioritization, filtering calls based on the complexity of inquiries, **reducing manual workload by 40%**.
- Oversaw the development of a proprietary data extraction and preprocessing pipeline, resulting in a **35% reduction in poor-quality data**.
- Deployed **classical machine learning** models alongside **deep learning** methods, coupled with **explainable AI** techniques to prioritize profiles and provide transparent reasoning for each decision.
- Exhibited **proactive problem-solving** by **manually preparing years of "analog data" within the first 2.5 months**, a critical task which I prioritize over my role-specific duties to ensure project success.
- **Managed a 15,000-line codebase**, ensuring maintainability and performance. **Designed 7 modules, with 3 adopted by other projects**, enhancing reusability and impact.
