## RESEARCH EXPERIENCE

### Research Assistant (remote)

Saarbrücken, Germany

• Artificial Intelligence aided Design and Manufacturing Group Max Planck Institute for Informatics Jul 2020 - Mar 2021

- Novel self-supevised neural method for obtaining the optimum design showcased in Topology Optimization
- Under Supervision of Dr. Vahid Babaei and with Collaboration of Prof. Julian Panetta at University of California, Davis, USA.
- Physics-based simulation of stiffness of the obtained design
- Generative continuous design via a single fixed mesh through controlling the frequencies
- This project which was defined as my master's thesis, has been published and presented in ACM Symposium on Computational Fabrication 2021
- I spent 1500+ hours until the submission of concluding paper

#### Work Experience

# Full-time Data Engineering and Data Science Specialist

Karaj, Iran

• Specializing in Advanced AI Solutions for Business Optimization Nahal Gasht April 2022 - December 2023

- The Problem: Implemented an AI-driven solution to address the challenge of prioritizing customers applications in the tourism sector.
- Impact: Decreased personnel error by 10%, mitigating potential losses equivalent to 5.5 times my annual salary. Also, awarded for dedication and leadership, leading to two promotions and a 70% salary increase within one year. Moreover, I established myself as the primary resource for onboarding and training new team members, receiving praise for my ability to simplify fundamental concepts.
- Developed a comprehensive screening process automation from customer communication to application prioritization, filtering calls based on the complexity of inquiries, **reducing manual workload by 40%**.
- Oversaw the development of a proprietary data extraction and preprocessing pipeline, resulting in a 35% reduction in poor-quality data.
- Deployed a machine learning model (XGBoost) coupled with Explainable AI techniques to prioritize applications and provide transparent reasoning for each decision.
- This experience demonstrates my ability to leverage AI technologies to optimize decision-making processes, drive significant business outcomes, and collaborate effectively with stakeholders from various backgrounds.
